

Computational physics

Vandan Pokal

September 2020

1 Aim

My goal for this course is to learn how to make my life easy. It's been a week and I've been spending a lot of time for this class because I am somewhat new to this and I am enjoying this a lot. I never knew how seamless it makes calculations. I intend to either go to grad school for physics or go to med school. At the end of the day, I want to do both.
